PROJECT

ERP System
I developed a comprehensive ERP web application to streamline employee management, task assignments, and project tracking. This system was built using the PHP Laravel framework, providing an intuitive interface for administrators to manage personnel and monitor progress efficiently.

Laravel Mock Test Platform
This is a feature-rich online Mock Test platform that enables students to take exams .Built with the PHP Laravel framework, the application provides seamless testing experiences with dynamic question generation and scoring.

E-Commerce Website
For my college minor project, I developed an E-Mall E-Commerce website using core PHP. The platform enables product listings, user registration, and online shopping features, delivering a complete online shopping experience.

WORK EXPERIENCE

Laravel Developer 2023

My period of six months at SkyBase Innovation was a game-changer. It gave me a solid base in Laravel framework development and boosted my tech skills. I learned to work well in a dynamic team. Now, I'm excited to use what I've learned on cool web development projects.
